Governance in Areas of Limited Statehood

The SFB 700 is an interdisciplinary research center established by the German Research Foundation (DFG) in 2006.

Some 60 scholars are involved, mostly political scientists, historians, legal scholars and economists based at Freie Universität Berlin, the University of Potsdam, the German Institute for International and Security Affairs (SWP), the Social Science Research Center Berlin (WZB), and the Hertie School of Governance (HSoG).

The SFB 700 analyzes governance in areas in which state authority is limited or completely lacking. Governance is understood as institutionalized modes of social coordination that aim to create and enforce binding rules and/or provide collective goods.

The Transformative Power of Europe

The Research College (KFG) “The Transformative Power of Europe” examines the role of the EU as promoter and recipient of ideas, analyzing the mechanisms and effects of internal and external diffusion processes in two research areas:

- The EU and Regional Institutions in Latin America, Africa, the Middle East and Asia
- Europe and the EU as Recipients of Diffusion

We bring together research on European affairs and institutionalize the cooperation with other universities and research institutions. A centerpiece of the KFG is the invitation of national and international guest scholars working on the diffusion of ideas as well as the promotion of junior researchers through (post) doc fellowships.
