[transcript]

Urte Undine Frömming / Steffen Köhn / Samantha Fox / Mike Terry (eds.)

Digital Environments

Ethnographic Perspectives Across Global Online and Offline Spaces

Digital technology already has permeated the physical world. Devices such as smartphones, tablets or wearables and online venues like virtual worlds and social networks have penetrated every part of our lives. The contributions to this volume apply innovative forms of ethnographic research to the digital realm. They examine the emergence of new online communities around Greenlandic news blogs or Malaysian LGBT Facebook groups, the rise of transnational migrant networks facilitated by social media, or the representation of conflicts and the proliferation of ideologies within online spaces.

Urte Undine Frömming is professor at the Institute of Social and Cultural Anthropology at the Freie Universität Berlin and head of the Research area Visual and Media Anthropology.
Steffen Köhn is the program coordinator of the M.A. program in Visual and Media Anthropology at Freie Universität Berlin.
Samantha Fox is currently a PhD candidate in Anthropology at Columbia University in New York.
Mike Terry is research associate at the Research Area »Visual and Media Anthropology« at Freie Universität Berlin.

Keywords: Digital Anthropology, Virtual Worlds, Social Media, Media Anthropology, Digital Culture, Media, Internet, Digital Media, Sociology of Media, Media Studies
