

Aktuelle online-Literaturliste von W. Evans (Juni 2003)
(veröffentlicht über die PCST_mailingliste)

I offer below a list of recently-published original research related to public understanding of science. This list is culled from the bibliography I prepare for each issue of Public Understanding of Science (<http://www.sagepub.co.uk/journals/details/j0541.html>). This list represents only a small portion of the publications included in recent installments of the bibliography, the portion that is available online free of charge.

Please note that some of these URLs point directly to .pdf or Word documents (rather than to web pages), some of which are rather large.

I hope that these links that are useful and that PCST-L members will be motivated to consult Public Understanding of Science for additional bibliographic resources.

William Evans, Ph.D.
