Polish-German Research Projects: Beethoven

DFG-NCN 2019

In order to strengthen international academic cooperation, and with a desire to fund high-quality scientific research within their own countries and an awareness that some of the best research can be delivered by working with the best researchers internationally, the Polish National Science Centre (NCN) and the Deutsche Forschungsgemeinschaft (DFG, German Research Foundation) are announcing the third call for proposals within the joint funding scheme “Beethoven”.

The initiative’s aims are to provide funding for integrated Polish-German research projects of outstanding scientific quality. It was launched in 2014 and expanded to include additional disciplines in 2016.

The “Beethoven CLASSIC 3” call, as a continuation of “Beethoven 2”, is open to research projects in the humanities, social sciences, chemistry, mathematics, physics (including astronomy) and materials sciences.

With “Beethoven LIFE 1” joint Polish-German research projects in the life sciences will be accepted for the first time.

For more detailed information on both calls please refer to the links below.

The deadline for the submission of proposals in the “Beethoven CLASSIC 3” and “Beethoven LIFE 1” call is **17 December 2018** (DFG and NCN).
