

# Governance Without a State?

*Policies and Politics in Areas of Limited Statehood*

**Edited by Thomas Risse**

“Written with force and coherence, this superb volume offers a compelling critique and alternative to mainstream social science approaches and will be a landmark in the study of the evolution of sovereignty and the nature of collective action.”

—William Reno, Northwestern University

Governance discourse centers on an “ideal type” of modern statehood that exhibits full internal and external sovereignty and a legitimate monopoly on the use of force. Yet modern statehood is an anomaly, both historically and within the contemporary international system, while the condition of “limited statehood,” wherein countries lack the capacity to implement central decisions and monopolize force, is the norm. Limited statehood, argue the authors in this provocative collection, is in fact a fundamental form of governance, immune to the forces of economic and political modernization.

Challenging common assumptions about sovereign states and the evolution of modern statehood, particularly the dominant paradigms supported by international relations theorists, development agencies, and international organizations, this volume explores strategies for effective and legitimate governance within a framework of weak and ineffective state institutions. Approaching the problem from the perspectives of political science, history, and law, contributors explore the factors that contribute to successful governance under conditions of limited statehood. These include the involvement of nonstate actors and nonhierarchical modes of political influence. Empirical chapters analyze security governance by nonstate actors, the contribution of public-private partnerships to promote the United Nations Millennium Goals, the role of business in environmental governance, and the problems of Western state-building efforts, among other issues. Recognizing these forms of governance as legitimate, the contributors clarify the complexities of a system the developed world must negotiate in the coming century.

**THOMAS RISSE** is professor of international politics at the Freie Universität Berlin and director of the Collaborative Research Center “Governance in Areas of Limited Statehood”. He has taught at Cornell University, Yale University, Stanford University, and Harvard University, as well as at the European University Institute in Florence and at the University of Konstanz in Germany.
